USEFUL INFORMATION 24**GUIDE**

Find the right size of your lampshade

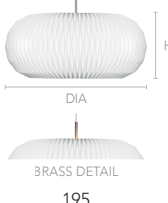

Handfolded lampshades

With an original LE KLINT fitting and depending on size, our lampshades can be used as table lamps, floor lamps, wall lamps or as a pendant. The lampshade's side length from directly under the collar to the lower edge, determines the product number. For example, the side length of Model 1/17 is 17 cm long. The full side length is measured on shades with no collar.

Our classic hand-folded lampshades are an important part of our DNA. Each lampshade is a piece of Danish Craftsmanship, which has been manufactured in Odense since 1943. The lampshades are part of the collection of pendants, table, floor and wall lamps. They can be replaced if necessary and used together with your old retro or vintage lamp. Treat it with a gentle hand and it will last for generations.

På det danske marked er shades kollektionen kun tilgængelig hos udvalgte partnere og LE KLINT Brand Stores / leklint.com

SHADE FITTING FOR MODEL 12	USED FOR MOUNTING SHADE MODEL 12					

All frames are designed for sockets with a shade ring.

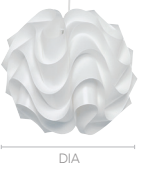

If you use an older socket, it is possible to order an extra accessory named "Reduction Rings" which makes it possible to fit the frames on a smaller diameter socket.

ALL SEASONAL COLLECTION ARE INCL. LIGHT SOURCE

Heart, Snowflake and Angel designs were created and produced in the same principles, as our hand-pleated lamp-shades. These designs are contributors to The Love & Light project where a percentage of the sales goes towards charity. Follow our charity work on leklint.com

MADE FOR YOU: Lamps in this product category are not in stock, but produced specifically for each order. Therefore, there will be additional time of delivery on these products. Can not be returned. For more information please contact our customer service.
Made for You er kun tilgængelig i LE KLINT Brand Stores /leklint.com

PRICES

The price-list is valid from July 1st 2022.
This price list is subjected to any VAT, tax changes,
delivery changes or LE KLINT adjustments.

GUARANTEE REGULATIONS

If the retailer receives a complaint from a customer within 24 months after the goods are sold to the retail customer, the complaint will be addressed within 2 weeks in accordance with the following regulations:

1. Warranty

The product of the supplier carries regular warranty in accordance with the Danish Sale of Goods Act. Please remember to enclose all relevant receipts or sales vouchers. Warranty repairs must be shipped in original LE KLINT packaging or otherwise securely packaged and boxed. The retailer must pay all carriage fees. Where applicable, LE KLINT will refund such fees if the forwarded package is covered by the warranty.

2. Maintenance/Complaints

The retailer must be able to supply adequate light sources for LE KLINT products. (Please see LE KLINT product manual) Light sources can be purchased directly from LE KLINT.

3. Delivery

All packaging must be intact and unopened upon delivery of all lamps and lampshades. If this is not the case, the carrier must be made aware immediately while delivering, as the receiver holds the right to receive the said product.

4. Repairs

LE KLINT offers a repair service for all LE KLINT products. Where applicable, a fee will be charged for service repairs, spare parts, secondary materials and re-packaging and re-shipping.

PRESERVATION OF YOUR LAMP-SHADE

The resilience of lampshades can weaken after years of being on a frame and can appear to develop a wavy edge. To re-establish the original shape of lampshades 1,2 and 6 is very simple. Sometimes, the paper lampshade's elastic string, that helps to reinforce the pleats, can loosen and simply needs to be restrung to re-establish the original look.

By reversing the plastic lampshade onto its frame can also resolve this problem.

1. Remove the lampshade from the frame and carefully widen the top end pleats 4 to 5 times taking care as to not dent or break any pleating
2. Remove the frame from the lamp base and place both items on a flat surface eg: tabletop
3. Using both hands, gather the thicker lower end of the shade until you can hold the lampshade cone shaped in one hand. If you find this process too difficult for one person have a second person hold the lampshade with both hands gently squeezing the top into a cone shape while you control the frame or vice versa
4. Leave overnight. The lampshade must not be left longer than the recommended time or be used with a light bulb until this process is completed.

RE-ASSEMBLING THE LAMP

1. To remove the frame from the upside down lampshade use one hand to hold and gently squeeze the gathered top of the shade while the other hand holds the frame inside and gently pulls it away from the shade or one person gently holds and squeeze the smaller top end of the shade with both hands while the other person gently removes the frame
2. Place both items on a flat surface with the thicker edge of the lampshade downwards

3. Re-fit the frame back onto the lamp base using the socket ring then replace the light bulb
4. Gather the smaller top edge of your lamp shade with both hands and place and click onto the frame
5. Your lamp is once again ready for use

CLEANING

LE KLINT's plastic lampshades can be cleaned with lukewarm water and detergent. Wash the lampshade with a soft brush, and rinse with a hand shower. It is our experience that with proper care, the lampshades will last for many years and continue to look great. The only way of removing dust and dirt from a lampshade made of paper is by using a soft brush.

MADE FOR YOU

Lamps in this product category are not in stock, but produced specifically for each order. Therefore, there will be additional time of delivery on these products. Can not be returned. For more information please contact our customer service.

CABLE LENGTH

Pendants are supplied with cords with a total length of 3 meters. Depending on the specific model and the installation the length of the free part may vary, however always min. 2.8 meters.

Table Lamps: Min. 1.5 meter.

Floor Lamps: Min. 2.3 meter.

Wall Lamps: Min. 1.5 meter.

LAMELLA & SWIRL Ceiling and Wall lamps: 3.0 meter

SEASONAL Collection: 5.0 meter

LIGHT SOURCE

From 1.1.2019 light sources are no longer included, except models with special light sources. Recommended light sources on www.leklint.com

SELECTING A LIGHT SOURCE

The light source is recommended on the basis of visible light quantity (lumen) and light quality (temperature + CRI) related to the specific lamp. But a different light source can also be used in the lamps, of course. Accordingly, this product manual lists the wattages for two types of light sources: an LED/energy-efficient light bulb and a traditional incandescent/halogen light bulb. The wattages listed are the maximum wattage that may be used and, accordingly, do not express how the best lighting is provided. The quantity of light is an individual preference which is why customers must be advised according to what they need. There must always be a space of at least 3 cm between the light source and lampshade/lamp.

LED/ CFL = Compact fluorescent lamp, energy-saving light

 = Symbol for wattages that applies to incandescent, halogen and energy-efficient halogen light bulbs.

INFORMATION

LE KLINT's customer service can be contacted by e-mail leklint@leklint.dk or tel. +45 6618 1920.

Here all authorized retailers will be able to get answers to questions about the products in the current collection, as well as in many cases answers to questions regarding older products from previous lamp collections.

LE KLINT's webpage is always in an ongoing development process, in order to service authorized retailers with image- and sales material as well as technical documentation.
